PROFILE INFO

As a fresher in the IT field, I bring proficiency in a range of programming languages and technologies. My journey in programming began with C++, and over the past 3 years, I've expanded my expertise to include PHP, JavaScript, and Linux, Node.js, Android development, Flutter, Python, etc. Programming to me is about creating something to solve complex problems and I love to delve and solve complex problems.

EXPERIENCE

CREATING VENT

2022 - 2023

- Me and of my friend were working on a project Vent, which was a basic event management app that would help teachers store event details in a database and retrieve the information.
- We used Flutter to create the application

MOODCHAT

2023 - 2024

- For our final year project, we tried to tap into AI by learning Machine Learning and NLP concepts for our desktop application MoodChat.
- Our aim was to detect hate speech and block hate messages through a transformer model.
- We created the desktop interface using Electron JS.

ACHIVEMENT

• 2023 - 2024

Been the leader (HEAD) of our college event "CURIOSITY"

• 2021 - 2024

Consecutively served as CR for my class for 3 years.

EXTRA CURRICULAR

- Love to make 3D arts and music
